TRIP (4 days/3 nights)

THE NATURE OF GLACIERS

Day 1 • Québec City / Tadoussac / Baie-Comeau

Depart Québec City at 8:30 a.m. Lunch (not included) in Tadoussac, followed by a whale-watching trip with a naturalist guide. We'll cruise along the coast and the banks of the Manicouagan River. Arrive around 8 p.m. in Baie-Comeau, in the heart of the world reserve known as the Manicouagan-Uapishka biosphere. Baie-Comeau is a modern city, representing Québec's hydroelectric engineering prowess, as shown by the fabulous Manic-2 and Manic-5 dams. But above all, Baie-Comeau is about its friendly and welcoming inhabitants. Go on! Experience the warmth of glacier country firsthand!

Day 2 and 3 • Jardin des Glaciers

• Glacier Exploration Station

Experience a northern adventure, 20,000 years back in time, beneath the ice! Thanks to the magic of sound, image, light and multimedia technology, you can take a virtual trip to the heart of the glaciers and uncover the reality of climate change.

• Maritime Adventure Park

The Maritime Adventure Park is a 40 km² site within the Jardin des Glaciers. Some 20,000 years ago, the passage of the Inlandsis Laurentien glacier left spectacular traces on this territory. Today you can observe all the phenomena the glacier left in its wake, including a 17 km coastal stretch.

• Adrenaline Zone

Enter, and experience some extraordinary sensations! In the Adrenaline Zone, you'll discover breathtaking landscapes as you partake in exciting activities. Cross lakes and fjords on rope bridges and discover the coastline and its riches on a Via Ferrata (high altitude trail), the longest such trail in North America.
